Procedures for Auction 108)

COMMENTS OF T-MOBILE USA, INC.

T-Mobile USA, Inc. (“T-Mobile”)^{1/} submits these comments in response to the *Public Notice* in the above-referenced proceeding on the procedures to be used for the auction of licenses in the 2496-2690 MHz (“2.5 GHz”) band (“Auction 108”).^{2/} T-Mobile welcomes the auction of this vital mid-band spectrum that is critical for Fifth Generation (“5G”) wireless networks. In order to expedite its use and deployment, the Commission should move quickly to auction the 2.5 GHz band and structure the auction in a manner that facilitates an efficient process, discourages speculation, encourages rapid use, and provides sufficient and accurate information to bidders.

I. INTRODUCTION AND SUMMARY

As the Commission has observed, the 2.5 GHz band, which is the single largest band of contiguous spectrum below 3 gigahertz, is prime spectrum for next-generation, including 5G,

^{1/} T-Mobile USA, Inc. is a wholly-owned subsidiary of T-Mobile US, Inc., a publicly traded company. T-Mobile and Sprint are now one company operating under the name T-Mobile. The merger closed on April 1, 2020.

^{2/} See *Auction of Flexible-Use Service Licenses in the 2.5 GHz Band for Next-Generation Wireless Services; Comment Sought on Competitive Bidding Procedures for Auction 108*, Public Notice, 36 FCC Rcd 645 (2021) (“Public Notice”).

mobile operations.^{3/} Meaningful licensing of this spectrum, however, has been suspended for nearly 30 years, leaving significant portions of the band, particularly in rural areas, lying fallow. The Commission should therefore promptly conduct Auction 108 so that the unlicensed portions of the 2.5 GHz band may be put to use for 5G deployment.

To ensure the auction’s success, the Commission should employ familiar and time-tested auction procedures, such as an auction using a traditional Simultaneous Multiple-Round (“SMR”) auction format. Not only is an SMR auction well understood by the Commission and bidders alike, but it would also allow bidders to engage in price discovery, which is the hallmark of what makes an auction economically rational and the touchstone for sincere bidders who plan to deploy the spectrum they acquire.

For the same reasons, the Commission may wish to consider using a Single-Round, Sealed-Bid (“SRSB”) auction format with Vickrey (or second-price) pricing (“V-SRSB”), if it declines to use an SMR auction. Similar to SMR auctions, V-SRSB auctions have been previously utilized successfully by the Commission and are therefore familiar to it and potential bidders. It also affords bidders similar benefits associated with price discovery.

The Commission should not adopt its proposed SRSB auction format with pay-as-bid (or first-price) pricing (“PAB-SRSB”). Not only is this a novel and untested format, but it will also encourage speculation and delay deployment. Proposals to adopt an either/or indicator, packaging bidding, and an “escape clause” should be rejected for similar reasons. These proposals only further complicate the bidding process while providing limited auction benefits.

^{3/} See *Transforming the 2.5 GHz Band*, Report and Order, 34 FCC Rcd 5446, ¶ 3 (2019) (“2.5 GHz Order”).

Finally, the Commission should ensure that bidders have access to accurate licensing data. Unfortunately, information currently available from the Commission does not reflect that – it suggests that the Commission will auction spectrum covering 28 billion MHz-pops. T-Mobile has calculated that the actual amount of white space is approximately 5.6 billion MHz-pops. The information currently available from the Commission also indicates some instances where spectrum is available, but is not and other instances where the information indicates that no spectrum is available, but it is. And in other cases, the data the Commission has made available inaccurately indicates the population that may be covered with particular spectrum blocks. The Commission should therefore provide updated, accurate data, and upfront payments, minimum opening bids, and bidding units should be adjusted to reflect the corrected data. Bidders should likewise be required to certify that they have evaluated marketplace factors and familiarized themselves with the rules and requirements related to this proceeding so that bidders have the certainty they need to fully participate in Auction 108.

II. AUCTION PROCEDURES FOR THE 2.5 GHz BAND SHOULD FACILITATE EASE OF PARTICIPATION

The Commission proposes two alternative formats to conduct the 2.5 GHz auction: (i) an SMR auction format that would offer every license for bid at the same time in multiple, successive rounds of bidding;^{4/} and (ii) a PAB-SRSB format under which bidders would bid in a single round.^{5/}

^{4/} See Public Notice ¶¶ 63-65.

^{5/} See *id.* ¶¶ 34-43.

A. Using an SMR Auction Format Will Help Promote an Efficient Process for Bidders and the Commission

T-Mobile supports the use of an SMR auction format for the 2.5 GHz band. *First*, because of its familiarity and simplicity, an SMR auction will facilitate participation by bidders. The Commission has conducted dozens of SMR auctions,^{6/} and it has routinely recognized that “a standard SMR format will provide bidders with a simple and efficient means of bidding on single or multiple licenses.”^{7/} Indeed, prior to the Broadcast Incentive Auction (“BIA”) in which the Commission, for the first time, implemented a clock auction format, an SMR auction format was the standard Commission auction format.^{8/} In the BIA case, the Commission found it appropriate to utilize a clock auction because it could offer generic blocks of spectrum.^{9/} But it

^{6/} See, e.g., *Auction of Advanced Wireless Services (AWS-3) Licenses Scheduled for November 13, 2014; Notice and Filing Requirements, Reserve Prices, Minimum Opening Bids, Upfront Payments and other Procedures for Auction 97*, Public Notice, 29 FCC Rcd 8386, ¶¶ 143-45 (2014) (“AWS-3 Auction Procedures Public Notice”) (highlighting AT&T’s comment that “this format has been used successfully for two decades and that the wireless industry is extremely familiar with it”); *Auction of 700 MHz Band Licenses Scheduled for January 24, 2008; Notice and Filing Requirements, Minimum Opening Bids, Reserve Prices, Upfront Payments, and Other Procedures for Auctions 73 and 76*, Public Notice, 22 FCC Rcd 18141, ¶¶ 138-44 (2007); *Auction of Advanced Wireless Services Licenses Scheduled for June 29, 2006*, Public Notice, 21 FCC Rcd 4562, ¶¶ 131-39 (2006) (“AWS-1 Auction Procedures Public Notice”).

^{7/} AWS-3 Auction Procedures Public Notice ¶ 145; AWS-1 Auction Procedures Public Notice ¶ 133.

^{8/} See *Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions*, Report and Order, 29 FCC Rcd 6567, ¶ 502 (2014) (“BIA Order”) (noting that an SMR auction “typically has been used for spectrum license auctions”).

^{9/} See *id.* ¶ 505; see also *Auctions of Upper Microwave Flexible Use License for Next-Generation Wireless Services; Notice and Filing Requirements, Minimum Opening Bids, Upfront Payments, and Other Procedures for Auctions 101 (28 GHz) and 102 (24 GHz)*, Public Notice, 33 FCC Rcd 7575, ¶ 12 n.26 (2018) (“Auctions 101 and 102 Procedures Public Notice”) (“To be more precise, the existence of a diverse set of encumbrances makes those encumbered blocks sufficiently different that we would not expect bidders to treat them as fungible units, which is a requirement for the generic-block clock auction we adopt for the 24 GHz band.”).

has recognized that an SMR auction is more appropriate than a clock auction when blocks in a band are not uniform within a market, as they are not here.^{10/}

Past spectrum auctions demonstrate that even smaller bidders and new entrants have been successful in an SMR auction format. For example, many smaller bidders, including those that received bidding credits, won several licenses in the AWS-3 auction, including for larger markets.^{11/} And the same is true of the Commission’s recent auction of spectrum in the 24 GHz band.^{12/} Because many potential bidders, including smaller bidders, are already familiar with these well-known procedures, they will be comfortable participating and require minimal resources to do so.

Second, an SMR auction will promote an economically rational result and ensure that the spectrum is obtained by sincere bidders that will actually deploy it. As the Commission observes, an SMR auction allows for price discovery.^{13/} It adds that price discovery “help[s] inform a bidder’s decision to shift its resources across areas as relative prices change over the course of the auction, which is particularly helpful for a bidder with multiple alternative business plans but without sufficient resources to pursue all of them.”^{14/} The need for price discovery is

^{10/} See *Public Notice ¶ 35* (“[A] clock auction format would not be appropriate here because each overlay license being offered is unique”); *Auctions 101 and 102 Procedures Public Notice ¶ 169 & n.334*.

^{11/} See *Auction of Advanced Wireless Services (AWS-3) Licenses Closes; Winning Bidders Announced for Auction 97*, Public Notice, 30 FCC Rcd 630, at Attach. A (2015) (“*AWS-3 Closing Public Notice*”) (reporting that Tristar License Group, LLC, which received a bidding credit, won several licenses, including in Boston, MA).

^{12/} See *Winning Bidders Announced for Auction of 28 GHz Upper Microwave Flexible Use Service Licenses (Auction 101)*, Public Notice, 34 FCC Rcd 4279, at Attach. A (2019) (listing 8538 GREEN STREET LLC as a winner of 86 licenses, BroadBand One of the Midwest, Inc. as a winner of 62 licenses, and BDCIH Wireless, LLC as a winner of 45 licenses – all of which received bidding credits).

^{13/} See *Public Notice ¶ 64*.

^{14/} *Id. ¶ 37*; see also *BIA Order ¶ 505* (pointing out that a benefit of a multiple-round auction is price discovery).

especially acute in circumstances like these where the licenses are not fungible and may be subject to different encumbrances due to existing incumbent authorizations. Not only will an SMR auction allow bidders to evaluate the spectrum landscape as it evolves during bidding and determine the market value of the licenses in which they may be interested, but it will also allow bidders to adjust their bidding strategies to optimize their holdings and satisfy budgetary constraints. In short, the price discovery allowed by an SMR auction will lead to more informed bidding decisions, which, in turn, will create auction efficiency by ensuring that the licenses will be issued to those who value them the most and are most likely to deploy the spectrum quickly.

Last, an SMR auction can be easily and promptly administered by the Commission. As noted above, the Commission has already implemented many SMR auctions. Those auctions have confirmed that an auction in which licenses are offered simultaneously in multiple rounds can be effectively conducted even with a large number of products and broad variety of participants. For example, the 700 MHz SMR auction included 214 qualified bidders, 101 of which won 1,090 licenses.^{15/} The AWS-1 SMR auction included 168 qualified bidders, 104 of which won 1,087 licenses.^{16/} And the AWS-3 auction included 70 qualified bidders, 31 of which won 1,611 licenses.^{17/} There is simply no reason to deviate from that successful process now.

^{15/} See *Auction of 700 MHz Band Licenses; 214 Bidders Qualified to Participate in Auction 73*, Public Notice, 23 FCC Rcd 276 (2008); *Auction of 700 MHz Band Licenses Closes*, Public Notice, 23 FCC Rcd 4572 (2008).

^{16/} See *Auction of Advanced Wireless Services Licenses; 168 Bidders Qualified to Participate in Auction No. 66; Information Disclosure Procedures Announced*, Public Notice, 21 FCC Rcd 8585 (2006); *Auction of Advanced Wireless Services Licenses Closes; Winning Bidders Announced for Auction No. 66*, Public Notice, 21 FCC Rcd 10521, at Attach. A (2006).

^{17/} See *Auction of Advanced Wireless Services (AWS-3) Licenses; 70 Bidders Qualified to Participate in Auction 97*, Public Notice, 29 FCC Rcd 13465 (2014); *AWS-3 Closing Public Notice*, at Attach. A.

And while SMR auctions have already been conducted successfully, they can be conducted even more efficiently with minor changes.^{18/} For example, the Commission can modify the bid increment size to speed the pace of an auction. It can also permit intra-round bidding and introduce switching constraints when certain auction milestones or revenue targets are met, similar to those recently implemented for the Rural Digital Opportunity Fund (“RDOF”) auction.^{19/} As T-Mobile previously pointed out, if the Commission limited switching from the first round of its past SMR auctions for the AWS-3 and 28 GHz bands and utilized 10 percent bidding increments, it could have reduced the number of rounds for those auctions by more than half.^{20/} A limit on switching in the 2.5 GHz band can likewise result in the auction being completed in two to three weeks.

A limit on switching is particularly appropriate for the 2.5 GHz band auction because the vast majority of licenses are subject to encumbrances and therefore unique products. Sincere bidders will be focused on specific geographic areas and particular spectrum to fill-in coverage gaps or to serve targeted areas – not to generally acquire 2.5 GHz spectrum. Their desire to switch bids on otherwise substitutable products, therefore, will be limited, particularly in later rounds. A limit on switching will also dissuade participation by auction-inefficient speculators, who are not focused on any specific geographic area and have no plans for service introduction,

^{18/} See *Public Notice ¶ 35*; see also *id. n.59* (noting that the AWS-3 auction took two and a half months).

^{19/} See *Rural Digital Opportunity Fund Phase I Auction Scheduled for October 29, 2020; Notice and Filing Requirements and Other Procedures for Auction 904*, Public Notice, 35 FCC Rcd 6077, ¶ 246 (2020) (“RDOF Auction Procedures Public Notice”).

^{20/} See Letter from Steve B. Sharkey, Vice President, Government Affairs, Technology and Engineering Policy, T-Mobile, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 18-120 and AU Docket No. 20-429, at 5 (filed Feb. 18, 2021).

from gaming the auction and preventing sincere bidders from winning their intended targets.

Even if bidding in an SMR auction takes modestly longer than an SRSB auction, the benefits of a more efficient auction that potentially returns more money to taxpayers, as demonstrated more fully below, far outweighs any perceived benefit of a speedy auction.

Contrary to the suggestions of some,^{21/} bidders like T-Mobile will not outbid others in an SMR auction simply to warehouse spectrum if an SMR auction is adopted. As the Commission is aware, T-Mobile has a strong track record of deploying its authorized spectrum quickly and has been actively deploying its 2.5 GHz spectrum in particular, including to rural areas. Through its access to the 2.5 GHz and other spectrum bands, T-Mobile launched the first nationwide standalone 5G network – providing, on average, two times faster speeds than LTE to more than 287 million people across 1.6 million square miles in the U.S.^{22/} And T-Mobile is committed to covering 99 percent of the total U.S. population, including 90 percent of the U.S. rural population, with robust 5G services.^{23/} The 2.5 GHz band is prime spectrum for 5G deployment, with T-Mobile already covering 125 million people in the past year.^{24/} T-Mobile also continues to offer innovative programs that rely heavily on the 2.5 GHz band to meet consumer needs as a

^{21/} See, e.g., Letter from Robert Finch, President, Select Spectrum, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 18-120, at 2 (filed Nov. 23, 2020) (“Select Spectrum *Ex Parte* Letter”); Letter from Paul J. Sinderbrand, Chief Strategy and Regulatory Affairs Officer, SoniqWave Networks LLC, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 18-120, at 2-3 (filed Oct. 28, 2020).

^{22/} See Press Release, *One Year into the Future of Wireless!*, T-Mobile (Apr. 2, 2021), <https://www.t-mobile.com/news/un-carrier/ceo-mike-sievert-merger-year-1>.

^{23/} See *Applications of T-Mobile US, Inc., and Sprint Corporation For Consent To Transfer Control of Licenses and Authorizations; et al.*, Memorandum Opinion and Order, Declaratory Ruling, Order Proposing Modification, 34 FCC Rcd 10578, ¶¶ 26-27 (2020) (“T-Mobile Merger Order”).

^{24/} See Neville Ray, *The Current State of 5G*, T-MOBILE (Apr. 19, 2021), <https://www.t-mobile.com/news/network/the-current-state-of-5g>.

part of its “T-Mobile for Good” initiative, including Project 10Million,^{25/} T-Mobile Connect,^{26/} and Connecting Heroes.^{27/} T-Mobile recently announced that it has made its most “Uncarrier” move yet – launching a home internet service and small town initiative, which includes a free 5G phone upgrade, upgrades to unlimited data, high-speed broadband access for nearly 10 million households, and a massive commitment to bring 5G to rural America.^{28/}

Moreover, those commenters that allege spectrum will be warehoused fail to take into consideration the high demand for mid-band spectrum, as demonstrated by the outcome of the C-band auction. And the new virtual world created by the novel coronavirus will only increase the demand for spectrum resources and require deployment. As CTIA recently reported, and the pandemic has highlighted, the need for mobile capacity is substantial and continues to rapidly increase. In the past year alone, mobile usage increased approximately 40 percent, and carriers have worked hard to meet those demands.^{29/} Not only did the wireless industry help connect 2.4 million students as they began learning from home for the first time, but carriers also

^{25/} See Press Release, *T-Mobile Launches Project 10Million, Historic \$10.7B Initiative Aimed at Closing the Homework Gap and Connecting Students to Opportunity –for Free*, T-Mobile (Sept. 3, 2020), <https://www.t-mobile.com/news/community/tmobile-launches-project-10million-initiative> (offering free service, free hotspots, and reduced-cost devices to 10 million households).

^{26/} See Press Release, *T-Mobile Connect Launches Early to Help the Most Vulnerable in America Get and Stay Connected*, T-Mobile (Mar. 23, 2020), <https://www.t-mobile.com/news/offers/tmobile-connect-launch> (providing low-cost services to help keep Americans connected during the pandemic).

^{27/} See Press Release, *T-Mobile Launches ‘Connecting Heroes’ – Free 5G for First Responder Agencies is Here*, T-Mobile (May 21, 2020), <https://www.t-mobile.com/news/un-carrier/connecting-heroes> (offering 5G services to first responders).

^{28/} See Press Release, *T-Mobile’s Next Un-carrier Move: #5gforall*, T-Mobile (Apr. 7, 2021), <https://www.t-mobile.com/news/un-carrier/t-mobiles-next-un-carrier-move-5gforall> (adding that T-Mobile will hire 7,500 new employees in small towns and rural communities over the next few years and provide \$25 million in grants for community development projects).

^{29/} See Meredith Attwell Baker, *Wireless in the Time of COVID-19*, CTIA Blog (Mar. 15, 2021), <https://www.ctia.org/news/blog-wireless-in-the-time-of-covid-19>.

strengthened their networks, increasing median wireless speeds in the U.S. nearly 50 percent.^{30/} Basic economic theory confirms that, in most cases, bidders do not acquire a revenue-generating asset and then decline to generate revenues from that asset. That is particularly true if the Commission – as it already has here – imposes reasonable performance requirements. There is simply no reason to believe that any operator – let alone one that has already aggressively built out the spectrum for which it is licensed – would bid on prime mid-band spectrum simply to warehouse it and let it lie fallow.

B. The Commission May Also Wish to Consider Conducting a V-SRSB Auction

If the Commission does not conduct an SMR auction, it should adopt procedures to implement a V-SRSB auction. Vickrey pricing encourages more truthful bidding and therefore a more efficient auction than pay-as-bid pricing. That is because an optimal bid in a PAB-SRSB auction depends not only on a bidder’s valuation, but also on the bids from expected competitors that are hard or impossible to predict before the auction.

Rather than overbidding, as the Commission suggests,^{31/} a bidder that values a license higher than another bidder may nevertheless bid with a lower value than that other bidder because it is unaware of how much the other bidder will bid. And it will have no opportunity to change its bid even when it values the license more highly. As a result, the Commission would assign the license inefficiently, harming consumers. With Vickrey pricing, a bidder is not required to guess how its competitors may bid and form a strategy based on that guess. Instead,

^{30/} See *id.*

^{31/} See *Public Notice ¶ 42.*

a bidder can bid in a manner that optimizes its needs and, knowing that the price will be set automatically to reflect competition, produce a more efficient auction result.

As the Commission recognizes,^{32/} it typically uses Vickrey pricing in combination with sealed bids. For example, it routinely uses Vickrey pricing for the assignment phases of its clock auctions. Indeed, the Commission used Vickrey pricing for all of its most recent spectrum auctions with assignment phases, including the C-band, 39 GHz band, and 24 GHz band.^{33/} The Commission also utilized Vickrey pricing in the recent RDOF and Connect America Fund Phase II auctions.^{34/} Bidders are now highly comfortable and familiar with Vickrey pricing, and it has been successful when combined with sealed bids. While the number of licenses and bidders have been relatively smaller in spectrum auctions using Vickrey pricing,^{35/} the Commission could limit the potential bidding options in Auction 108 by, as discussed further below, declining to permit package bidding. As the Commission observes, in the case of an individual item and no package bids, the “second price” would simply be the second highest bid.^{36/}

^{32/} See *id.* ¶ 42 n. 74.

^{33/} See *Auction of Flexible-Use Service Licenses in the 3.7-3.98 GHz Band for Next-Generation Wireless Services; Notice and Filing Requirements, Minimum Opening Bids, Upfront Payments, and Other Procedures for Auction 107; et al.*, Public Notice, 35 FCC Rcd 8404, ¶ 214 (2020); *Incentive Auction of Upper Microwave Flexible Use Service Licenses in the Upper 37, 39, and 47 GHz Bands for Next-Generation Wireless Services; Procedures for Auction 103*, Public Notice, 34 FCC Rcd 5532, ¶ 229 (2019); *Auctions 101 and 102 Procedures Public Notice* ¶ 277.

^{34/} See *RDOF Auction Procedures Public Notice* ¶¶ 218, 252 n.459; *Connect America Fund Phase II Auction Scheduled for July 24, 2018; Notice and Filing Requirements and Other Procedures for Auction 903*, Public Notice, 33 FCC Rcd 1428, ¶¶ 254, 260, 269 (2018).

^{35/} See *Public Notice* ¶ 42 (“Moreover, given the very large inventory of licenses offered in Auction 108, the computation of ‘second prices’ (or Vickrey prices) would be exceedingly complex and potentially intractable within a reasonable amount of processing time.”).

^{36/} See *id.* ¶ 42 n.73.

C. The Commission Should Not Adopt the Proposed PAB-SRSB Auction

Unlike a standard SMR auction or a V-SRSB auction, the Commission’s proposed PAB-SRSB auction is effectively an experiment.^{37/} The Commission has rarely conducted a PAB-SRSB auction,^{38/} and never with many potential bidders and licenses. For example, while the Commission employed a PAB-SRSB auction format for the auction of certain Cellular Radiotelephone Service licenses, that auction involved only two licenses covering two different unserved areas and only had two qualified bidders.^{39/} The Commission has often rejected the PAB-SRSB structure since then.^{40/}

In contrast, in almost all cases when it used an SRSB auction format, the Commission used Vickrey pricing and not the PAB-SRSB design proposed here. And that is for good reason. A PAB-SRSB auction can be complicated. It requires a bidder to evaluate *all* possible bidding options against its business needs and budgets and include those various combinations in a *single* bid before the auction even begins. And, unlike a V-SRSB auction, a PAB-SRSB auction commits the bidder to the highest price in that bid without a fallback option. In addition, the proposed PAB-SRSB auction creates uncertainty by keeping bidders in the dark and forcing them to make a best guess about others’ bidding habits. Not only could that uncertainty result in

^{37/} See *id.* ¶ 35 (recognizing that its proposed SRSB format “departs from the multiple-round procedures that the Commission typically has used in auctioning spectrum licenses”).

^{38/} See *id.* ¶ 42 n.74.

^{39/} See *Closed Auction of Licenses for Cellular Unserved Service Areas Scheduled for June 17, 2008; Notice and Filing Requirements, Minimum Opening Bids, Upfront Payments, and Other Procedures for Auction 77*, Public Notice, 23 FCC Rcd 6670 (2008).

^{40/} See, e.g., *Auction of H Block Licenses in the 1915-1920 MHz and 1995-2000 MHz Bands Scheduled for January 14, 2014; Notice and Filing Requirements, Reserve Price, Minimum Opening Bids, Upfront Payments, and Other Procedures for Auction 96*, Public Notice, 28 FCC Rcd 13019, ¶ 134 (2013) (noting that all parties that took a position on an SRSB auction opposed it).

bidding mistakes – for example, if a bidder guesses incorrectly about how others are bidding – and post-auction bidding regret, but it could also leave many, including rural, areas unserved.^{41/}

The losses in efficiency from a lack of price discovery will not be mitigated by public pricing information. Recent spectrum auctions, including the AWS-3, 3.5 GHz, and C-band auctions, demonstrate that the value of spectrum varies widely depending on numerous factors, making prices derived from past spectrum auctions not reliable indicators of future spectrum prices. Asserting that smaller entities can incorporate information from secondary market transactions also incorrectly assumes that the information is publicly available. To the contrary, information about secondary market transactions is difficult to discover because many parties' pricing information is confidential. And although smaller operators may know more about the local landscape, which may inform their decisions, those bidders will have no idea how *other* bidders (including speculators) will bid and will be afforded no opportunity to react. With Vickrey pricing, bidders do not have as great a need to guess about others' valuations in determining their bids.

WISPA claims that a PAB-SRSB auction would allow for more flexibility and pursuit of backup plans.^{42/} But WISPA provides no explanation for its claim. And because, as noted above, bidders will be forced to incorporate all potential back-up plans – in addition to their intended plans – in a single bid with pay-as-bid pricing, their flexibility will actually be *reduced* under the Commission's proposed PAB-SRSB auction. Whichever bidder is selected as the

^{41/} See Letter from Kara Graves, Assistant Vice President, Regulatory Affairs, CTIA, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 18-120, at 3 (filed Oct. 19, 2020) (stating that an SRSB auction, where bidders are essentially bidding blind, “risks inefficient and unpredictable outcomes – including unsold [licenses]”).

^{42/} See Letter from Louise Peraertz, Vice President of Policy, WISPA, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 18-120, at 6 (filed Nov. 23, 2020).

winning bidder, that bidder will be committed to its “first price” and have no flexibility to adjust its strategy.

Select Spectrum asserts that a PAB-SRSB auction would give it a better opportunity to successfully bid on the available spectrum.^{43/} Select Spectrum is correct. The proposed PAB-SRSB does reward one class of bidders: speculators. But spectrum brokers like Select Spectrum are generally indifferent to where and how much spectrum they acquire – their only goal is to obtain spectrum that they can later sell in secondary market transactions. Encouraging their participation therefore makes the proposed PAB-SRSB auction more like a lottery, with random winners and losers. Indeed, it is telling that no current provider of mobile wireless communications service has supported a PAB-SRSB auction for the 2.5 GHz band. Although any losing bidder with actual market requirements may approach a winning bidder in the secondary market to obtain a license it desires, those transactions will take time, involve uncertainty, and delay service to the public. That delay will impact not only the deployment of the licenses at issue, but also the deployment of geographically adjacent licenses that may require spectrum coordination. Moreover, the proceeds of the transaction would go to the winning bidder and not the U.S. Treasury, depriving taxpayers of auction revenues.

D. Other Commission Proposals Further Complicate a PAB-SRSB Auction

The Commission attempts to alleviate some of the problems associated with its proposed PAB-SRSB auction by, among other things, proposing an either/or indicator, package bidding, and an “escape clause.”^{44/} But those proposals introduce their own problems and add to the

^{43/} See generally Select Spectrum *Ex Parte* Letter.

^{44/} See Public Notice ¶¶ 48-62.

complexity of the proposed PAB-SRSB auction. Their implementation will likely create even greater bidder confusion and further deter auction participation.

An either/or indicator for a specific county could complicate business strategies and be problematic for bidders when assessing their bids against their overall budget constraints nationwide. For example, because of budget constraints, a bidder could want a single license in Los Angeles or New York, but not both. However, because the proposed either/or indicator would be limited to licenses within a non-metropolitan county or metropolitan counties in the same Major Economic Area, the bidder could end up being a winning bidder for both.

Package bidding likewise adds unnecessary complexity to the auction by requiring bidders to consider, and the Commission's auction system to accept, potentially large numbers of packages. While the Commission proposes to limit the number of packages, many smaller bidders simply do not have, or have the resources to acquire, the high level of bidder sophistication and expertise necessary to conduct the analyses that package bidding requires. And because the Commission's proposal for package bidding would be limited only to larger counties, bidders would still be subject to exposure risks, especially in rural areas.

Finally, the proposed optimization software's need for an escape clause is untested and even more evidence of why the Commission should not adopt its proposed PAB-SRSB auction format. Because this spectrum is so critical to deploy 5G, especially in rural America, this auction should not be an experiment. Bidders must have confidence and certainty about how the auction be conducted and concluded.

III. BIDDERS MUST HAVE ACCESS TO ACCURATE LICENSING DATA AND BIDDING PRICES SHOULD REFLECT THAT DATA

A. The Commission Should Correct Errors in the Draft Auction Product List

T-Mobile appreciates that the Commission plans to make more information about encumbrances in the 2.5 GHz band available prior to the auction. In doing so, the Commission should ensure that the information is easy to understand so that potential bidders have an accurate understanding of where spectrum is, and is not, available. The extensive work of the Commission's staff evident in assembling the Auction 108 Inventory Product list as Attachment A to the Public Notice is a good start. This list contains 8305 county/spectrum block combinations the Commission has identified as licenses available for auction, prior to the completion of the Tribal Priority Window licensing process. While this list is generally accurate, it contains errors that could result in the Commission auctioning licenses where no white space spectrum is available or failing to auction licenses where spectrum is available. Attachment A to the Public Notice should therefore be corrected as quickly as possible.

In particular, T-Mobile has identified 273 Block 2 licenses that should *not be available* for auction because there is no identifiable white space for any of the spectrum being auctioned. This list is attached as Appendix 1 to these comments and includes some of the most populous metropolitan areas in the country, including New York (Kings, Queens, Bronx, Nassau, and New York Counties), Dallas, TX, Orange, CA, Detroit (Wayne County, MI), Boston (Suffolk County, MA), Philadelphia, PA, Orlando (Orange County, FL), and Washington, DC (the District of Columbia, and Montgomery County, MD). These licenses cover over 63 million pops, but no available spectrum. Accordingly, these licenses should be removed from the auction product list.

T-Mobile has also identified ten Block 1 and six Block 3 licenses that should not be available for auction because there is no identifiable white space for any of the spectrum being auctioned. These are contained in Appendices 2 and 3 to these comments. These counties contain an additional 1 million pops that would be auctioned without any available spectrum.

Finally, T-Mobile has identified licenses that should be added to the product list and is still evaluating whether some additional licenses should be removed from the product list because the only white space available appears to be over bodies of water. In particular, T-Mobile has identified 89 licenses that should likely be *added* to the auction product list. This list, along with explanations of why these licenses should be added to the product list, is included in Appendix 4. T-Mobile has also identified some products that may only have white space that covers a body of water. For example, it appears that the only white space in Manitowoc, WI is over Lake Michigan, as shown in Figure 1 below. T-Mobile asks the FCC to remove any auction product where the only white space is located over a body of water and does not have any fixed population to serve.^{45/}

^{45/} This excludes the Gulf of Mexico which, while a water body, does have wireless service for offshore oil and gas rigs.

Figure 1. White Space in Manitowoc, WI

B. Available Population Data Should be More Accurately Reflected

Potential bidders need precise information about the licenses that will be made available at auction and their encumbrances. It is particularly important that potential bidders in Auction 108 have clear and accurate information because many white space licenses are encumbered with complicated geographic and frequency overlaps. Unfortunately, information currently available from the Commission does not reflect that – it suggests that the Commission will auction spectrum covering 28 billion MHz-pops when T-Mobile has calculated that the actual amount of white space is approximately 5.6 billion MHz-pops.^{46/} That is because in many instances, population data is presented for an entire county, but there may be no spectrum available in the spectrum block being auctioned in portions of that county.

^{46/} See Public Notice at Attach. A.

To give a graphical representation of this, below is an example of the Chicago area – Cook County, IL. Attachment A of the Public Notice asserts that all three blocks are available for auction and simply lists the population of the county at 5.1 million pops, requiring 7,000 bidding units, an upfront payment of \$700,000, and a minimum opening bid of \$1.5 million. This would lead a bidder to believe that all available megahertz may be used throughout the 5 million pops. However, the vast majority of the population and geography – across all three blocks – of Cook County, IL is already licensed. This results in the actual white space population for all three blocks to be approximately 211 persons in a tiny rural sliver of the county, as shown in Figure 2 below.

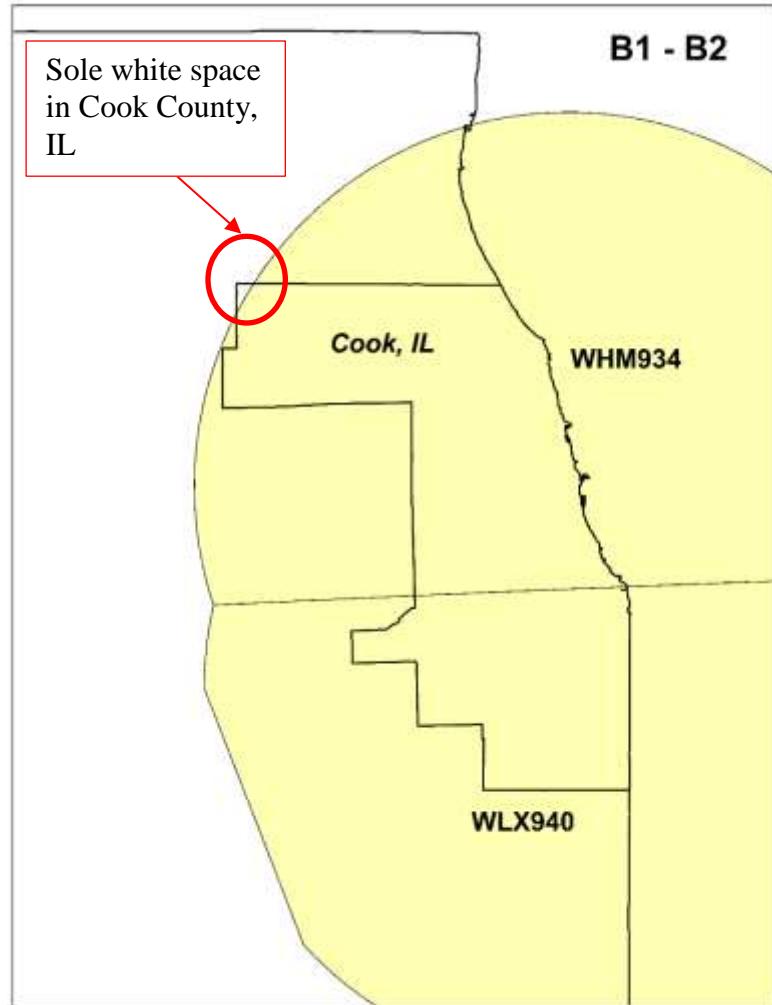

Figure 2. Cook County, IL – B1-B2 Block Call Signs

The Commission should therefore adjust the information publicly available to indicate the population in a county where the spectrum being auctioned is available.^{47/} Bidders would still be required to conduct their own diligence to determine exactly *how much* spectrum is available, but they would at least have more clarity that a license would not permit the use of the spectrum block throughout a county. Making this information available is consistent with the

^{47/} See *infra* III(C) discussing T-Mobile's proposed population adjustments for licenses.

approach the Commission has taken in other auctions that featured the presence of incumbents. For example, in the 900 MHz Specialized Mobile Radio Service and 220 MHz auctions, the Commission clearly denoted where a license covered only a partial market as well as licenses with bandwidths that vary across the geographic areas covered due to previous partitioning and disaggregation.^{48/} The Commission should likewise make clear the population where *any* of the spectrum in the block being auctioned may be available and direct auction participants on how to learn more about encumbrances (*i.e.*, the specific spectrum that may be available in that more limited geographic area). A more accurate spectrum landscape will help inform bidding and reduce instances in which a bidder erroneously believes it obtained greater spectrum rights than it did.

T-Mobile applauds the Commission's reminder to bidders that they have an obligation to perform their own due diligence prior to the auction and that potential bidders are solely responsible for investigating all technical and marketplace factors.^{49/} Consistent with that reminder, T-Mobile agrees that the Commission should require any applicant seeking to participate in Auction 108 to certify in its short-form application, under penalty of perjury, that it has read the public notice adopting procedures for Auction 108 and familiarized itself with those procedures and the requirements for obtaining a license and operating facilities in the 2.5 GHz band.^{50/} Putting bidders on notice about their responsibility to evaluate fully the 2.5 GHz

^{48/} See *Auction of Phase II 220 MHz Service Spectrum Scheduled for June 20, 2007, Notice and Filing Requirements, Minimum Opening Bids, Upfront Payments and Other Procedures for Auction 72*, Public Notice, 22 FCC Rcd 3404, at Attach. A (2007); *Auction of 900 MHz Specialized Mobile Radio Service Licenses Scheduled for February 11, 2004; Revised List of Available Licenses*, Public Notice, 18 FCC Rcd 25788, at Attach. A (2004).

^{49/} See *Public Notice ¶ 6*.

^{50/} See *id.* ¶ 8.

spectrum market will reduce post-auction concerns and frivolous disputes. To aid auction participants to make that certification, the Commission should adjust the information available as discussed above.

C. The Commission Should Adjust Upfront Payments, Minimum Opening Bids, and Bidding Units to Accurately Reflect Population That Can Be Served

The Commission should adjust the upfront payments, minimum opening bids, and bidding units for each license to more accurately reflect data about where spectrum is actually available. The Commission explains that the specific inventory of licenses in Auction 108 will be based on the Commission's review of applications received in the Rural Tribal Priority Window and will be announced in a separate public notice to be released before the short-form application filing deadline.^{51/} The Commission, however, does not propose to adjust upfront payments, minimum opening bids, or bidding units based on the existing substantial encumbrances or the newly created encumbrances due to the applications received in the Rural Tribal Priority Window.^{52/} This approach will certainly cause bidder confusion.^{53/}

In parallel with updating and ensuring the accuracy of its licensing data, the Commission should therefore assign upfront payments, minimum opening bids, and bidding units consistent with the population that can be served by the spectrum in the block being auctioned – not the total *potential* MHz-pops in an entire county.^{54/} In many instances, the spectrum block being

^{51/} See *id.* ¶ 2.

^{52/} See *id.* ¶¶ 22-26, 46-47.

^{53/} See, e.g., Sandeep Gupta and Brady Collins, *Opportunities and Challenges of Deployment C-band*, Barclays, at 16, 18 (Apr. 7, 2021) (claiming 289 million pops are available for auction and listing all 9.8 million pops in Los Angeles County when only a fraction are actually available and 2.5 million pops in Kings County New York when there is no spectrum available).

^{54/} See *Public Notice* ¶ 22 (“Given the uncertain total amount of available white space spectrum in each 2.5 GHz band license pending resolution of Rural Tribal Priority Window applications and other factors, we propose to base upfront payments on the total potential MHz-pops of each license offered in

auctioned may be encumbered in all but a small part of the county. Upfront payments, minimum opening bids and bidding units based on the entire population of a county in those cases is therefore misleading.

The Commission correctly starts to take this approach by distinguishing between the two licenses with approximately 50 megahertz each and the license with 16.5 megahertz, logically divided by the existing EBS license structure.^{55/} And the Commission has previously suggested that levels of incumbency may be taken into consideration when establishing minimum opening bids.^{56/} More recently, the Commission recognized that some bidders may wish for upfront payments and minimum opening bids for the 3.45 GHz band to be adjusted based on encumbrances related to federal operations that will remain in the band.^{57/} The Commission

the auction, rather than on available white space in each block.”); *id.* ¶ 47 (“Given the potential lack of accurate information on available white space in the 2.5 GHz band, we propose to establish the minimum bid amounts in Auction 108 using the total potential MHz-pops of each license offered in the auction, rather than on available white space in each block.”); *id.* ¶ 79.

^{55/} See *id.* ¶¶ 2, 22, 47.

^{56/} See *Narrowband PCS Spectrum Auction Scheduled for October 3, 2001; Notice and Filing Requirements, Minimum Opening Bids, Upfront Payments and Other Procedural Issues*, Public Notice, 16 FCC Rcd 13201 (2001); *Amendment of Part 1 of the Commission’s Rules – Competitive Bidding Procedures*, Third Report and Order and Second Further Notice of Proposed Rule Making, 13 FCC Rcd 375, ¶ 141 (1997); see also, e.g., *Amendment of Part 90 of the Commission’s Rules to Facilitate Future Development of SMR Systems in the 800 MHz Frequency Band; Implementation of Sections 3(n) and 322 of the Communications Act – Regulatory Treatment of Mobile Services; Implementation of Section 309(j) of the Communications Act – Competitive Bidding*, First Report and Order, Eighth Report and Order, and Second Further Notice of Proposed Rulemaking, 11 FCC Rcd 1463, ¶ 202 (1995) (stating that in a public notice issued prior to the auction of the spectrum, the Commission “will announce population information corresponding to each license and the upfront payment amount for each EA license” and that “population coverage for each channel block in each EA will be based on a formula that takes into account the presence of incumbent licensees”); *Amendment of Part 90 of the Commission’s Rules to Facilitate Future Development of SMR Systems in the 800 MHz Frequency Band; Implementation of Sections 3(n) and 322 of the Communications Act – Regulatory Treatment of Mobile Services; Implementation of Section 309(j) of the Communications Act – Competitive Bidding*, Memorandum Opinion and Order and Order on Reconsideration, 12 FCC Rcd 9972, ¶ 119 (1997).

^{57/} See *Auction of Flexible-Use Service Licenses in the 3.45-3.55 GHz Band for Next Generation Wireless Services; Comment Sought on Competitive Bidding Procedures for Auction 110*, Public Notice, FCC 21-33, ¶¶ 26-28, 69-72 (rel. Mar. 18, 2021). T-Mobile did not advocate for adjustments to the

should implement that approach here. Assigning minimum opening bids, upfront payments, and bidding units that take encumbrances into consideration will better align auction prices with the population that a bidder can actually cover with each license auctioned. A contrary approach may suggest to bidders that they will obtain more geographic rights than are available in the auction, leading not only to post-auction disputes with incumbents, but also challenges at the Commission regarding the value of the licenses they obtained.

To assist the Commission with updating the upfront payments, minimum opening bids, and bidding units, T-Mobile is providing Appendix 5 to these comments. This appendix lists nearly all licenses that T-Mobile believes contain *any* white space (regardless of the amount of spectrum in that white space), along with T-Mobile's estimate of the white space population contained in each license.^{58/} Bidders would be required to assess the precise spectrum available in the area where *any* spectrum in the block being auctioned is available.

T-Mobile proposes using these population values of so that bidders have a realistic expectation of where spectrum may actually be available and to reduce the possibility of buyer's regret. Applying these adjustments to the Cook County, IL example discussed above – where only 211 pops are available in the county – the new auction product list for the three licensed

minimum opening bids and upfront payments for the 3.45 GHz band based on federal operations, because the 3.45 GHz band is subject to the Commercial Spectrum Enhancement Act, which requires the auction proceeds to cover 110 percent of federal incumbents' relocation costs, and reducing bidders' payments could cause the auction to fail. The 2.5 GHz band is not subject to those same requirements.

^{58/} The 8305 licenses in the FCC proposed auction product list minus 273 Block 1, ten Block 2, and six Block 3 licenses that T-Mobile identified are erroneously included equals 8016 licenses. T-Mobile's proposed adjustment list only adds up to 7940 licenses, a difference of 76 licenses. This is because, based on T-Mobile's tracking of Tribal Priority Window licensing, it has made certain assumptions about rural counties being removed from the auction product list. Since the Tribal Priority Window licensing will continue during the pendency of this proceeding, there will be slight differences in product lists until the Commission concludes processing the applications submitted during that licensing window.

blocks in that market would each require 5 bidding units, have an upfront payment of \$500, and have a minimum opening bids at \$500.^{59/}

As demonstrated in the Cook County, IL example, using the actual white space population values to adjust the licenses' bidding units, upfront payments, and minimum opening bids would result in lower values. This would both more accurately reflect the utility of the licenses while also permitting small bidders who may have less bidding capacity to participate in the auction for licenses that could otherwise be cost-prohibitive.

IV. CONCLUSION

The 2.5 GHz band is poised to continue to be a driver of next-generation 5G services, especially in rural areas. The Commission should therefore take all necessary steps to ensure that it is auctioned quickly and efficiently put into operation using processes that discourage speculators who have no incentive to deploy it quickly. Those steps include making the spectrum available through the familiar SMR auction format or a V-SRSB auction format but not a PAB-SRSB. They also include providing potential bidders with accurate and easy-to-understand information about the licenses being made available, including precise data about where incumbents are and are not.

^{59/} For licenses where T-Mobile did not identify any *population* within the white space, but there is *geographic* white space in the county (*i.e.*, areas with no population), T-Mobile assigned a population value of 1 to suggest using the minimum bidding units, upfront payments, and minimum opening bid values.

Respectfully submitted,

Background Analysis on Additional Blocks for Auction 108

State	County	Call Sign in County (Active or Cancelled)	Blocks Impacted	Channels Impacting White Space	Licensee Name	Status	Comments on Cancelled, Terminated or Expired Licenses
Alabama	Calhoun	WNC883	2, 3	G1-G4	Atalla City Board of Education	Active	
Alabama	Calhoun	KZW56	2, 3	G1-G4	Board of Education (Birmingham)	Active	
Alabama	Calhoun	WLX795	2, 3	G1-G4	Heard County School System	Active	
Alabama	Calhoun	WND324	2, 3	G1-G4	Fixed Wireless	Active	
Alabama	Calhoun	WNC396	2, 3	G1-G4	Curry High School	Terminated	License granted in 1997; apparently never constructed; ULS shows license was converted to GSA in 2005; Licensee failed to file a renewal in 2007 or file any extension request. FCC issued letter in October 2007 terminating license.
Alabama	Calhoun	WNC391	2, 3	G1-G4	West Blocton High School	Terminated	License converted to GSA in 2005. License was part of Group of 54 Reinstated Licensees (DA 09-1340). Special Condition indicates "The licensee's geographic service shall not include any portion of its former protected service area that overlapped with another licensee whose license was in active status on January 10, 2005 and on the date the expired licensee's late-filed renewal application was granted." Filed requests for Extension of Time to make SSR filing in 2011. FCC denied via Memorandum Opinion and Order in 2012 (DA 12-532), cancelling license as of November 1, 2011.
Alabama	Etowah	WNC883	2, 3	G1-G4	Atalla City Board of Education	Active	
Alabama	Etowah	KZW56	2, 3	G1-G4	Board of Education (Birmingham)	Active	
Alabama	Etowah	WLX795	2, 3	G1-G4	Heard County School System	Active	
Alabama	Etowah	WND324	2, 3	G1-G4	Fixed Wireless	Active	

State	County	Call Sign in County (Active or Cancelled)	Blocks Impacted	Channels Impacting White Space	Licensee Name	Status	Comments on Cancelled, Terminated or Expired Licenses
Alabama	Etowah	WNC396	2, 3	G1-G4	Curry High School	Terminated	License granted in 1997; apparently never constructed; ULS shows license was converted to GSA in 2005; Licensee failed to file a renewal in 2007 or file any extension request. FCC issued letter in October 2007 terminating license.
Alabama	Etowah	WNC391	2, 3	G1-G4	West Blocton High School	Terminated	License converted to GSA in 2005. License was part of Group of 54 Reinstated Licensees (DA 09-1340). Special Condition indicates "The licensee's geographic service shall not include any portion of its former protected service area that overlapped with another licensee whose license was in active status on January 10, 2005 and on the date the expired licensee's late-filed renewal application was granted." Filed requests for Extension of Time to make SSR filing in 2011. FCC denied via Memorandum Opinion and Order in 2012 (DA 12-532), cancelling license as of November 1, 2011.
Alabama	Jefferson	WND520	1, 2	B1-B4	Univ of Montavallo	Terminated	Terminated for failure to meet SSR in 2011 via MO&O in April 2012 (DA 12-515)
Alabama	Jefferson	WNC394	1, 2	B1-B4	Francis Marion	Terminated	Reinstated in 2009. Cancelled 11/1/2011 for failure to meet SSR
Alabama	Jefferson	WNC677	1, 2	A1-A4	Berry High School	Terminated	License converted to GSA in 2005. Filed for Extension of Time for SSR in 2011. FCC denied via MO&O in 2012. License cancelled as of November 1, 2011 (DA12-492)
Alabama	Jefferson	WNC395	1, 2	A1-A4	Bibb County High School	Terminated	Reinstated in 2009. Cancelled 11/1/2011 for failure to meet SSR
Alabama	Jefferson	WND277	1, 2	A1-A4	Hoover City Board of Education	Expired	Failed to file renewal in 2008. Terminated 7/26/2008
